

R4® SELF COUNTER-SINKING PATENTED

SINKER INTEGRATED IN THE COUNTERSUNK HEAD

- The 6 self-contained cutting pockets act like a circular saw blade...
- ...and transport the "drill-dust" away from the edge of the screw hole. They also widen the countersinkhole only around the head shape.
- The screw head closes the hole exactly, leaving no damaged fibers around the wider area of the head.

PRE-COUNTERSINKING IS NO LONGER REQUIRED. IT IS DONE BY THE SCREW ITSELF.

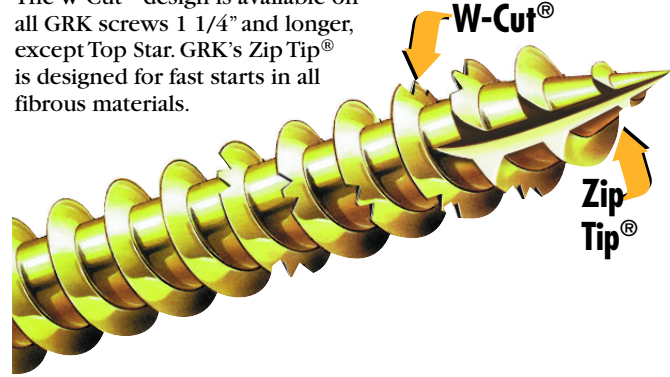

The head has a 90° angle at the underside which allows it to fit perfectly into the pre-countersunk holes of hardware fittings such as hinges or locks.

W-CUT® & ZIP-TIP® PATENTED

- NO pre-drilling
- NO hassles
- NO strip drive
- strong heads
- reduced splitting
- easy start

The W-Cut® is a patented thread design which acts like a circular saw blade, cutting through any fibrous materials with ease. This unique design reduces the amount of torque required to install the screw and maintains a high pull-out strength. By cutting through rather than pressing fibers aside, the W-Cut® also reduces material splitting.

The W-Cut® design is available on all GRK screws 1 1/4" and longer, except Top Star. GRK's Zip Tip® is designed for fast starts in all fibrous materials.

STAR-HEAD

All GRK screws have a star-head design. This recess increases the holding power of the bit and makes it virtually impossible to strip the head.

CLIMATEK® EXCLUSIVE

- triple zinc polymer
- long-life exterior coating
- corrosion inhibitor

The revolutionary Climatek® coating is featured exclusively on GRK products. With a gold coated appearance it is the only such plating which offers rust protection of 29 Kesternich cycles. Climatek is ideal for your outdoor projects.

Climatek® Gold matches nicely with virtually all woods and other surfaces. Eliminate unsightly green, grey or black screw heads without reducing your rust protection. Once installed into a surface, GRK screws are almost indistinguishable from brass screws. This high-class appearance will certainly add to the beauty of your project, whatever or wherever it may be.

Limited **LIFETIME WARRANTY** to original retail purchaser. Non-transferable. For warranty details see www.grkfasteners.com

PHEinox® EXCLUSIVE

- stainless steel
- rust free
- R4®, RSS®, Trim Head®

PHEinox® stainless steel screws are another first from GRK. PHEinox® screws provide a reasonably priced alternative when only stainless steel will do.

Our special composition PHE stainless steels is one of a kind. It is hardened and rust free.

GRK's patented R4®, RSS® and Trim® screws are available in PHEinox® stainless steel. For projects that should last a lifetime, use PHEinox® screws from GRK.

Available in many sizes.

MISS® METAL SIDING/ROOFING PATENTED

- inside recess
- powder coated many colors
- NO pre-drilling
- steel to wood or steel to steel construction

The MSS® was developed and patented based on the RSS® model. The screw has an integrated washer head and is complemented with a special synthetic washer below the screw head. No pre-drilling is needed due to the MSS® multiple tip design for thin sidings as well as thick studs. The MSS® is available in different colors to match siding appearance and is powder coated for exceptionally high corrosion resistance.

PAN HEAD PATENTED

- self-tapping
- W-Cut® thread design
- Climatek® plated
- ideal for cabinets

GRK's Pan Head screw works without pre-drilling and can be used in a multitude of construction materials. It is Climatek®-plated and has superior rust protection. Its patented thread design allows for easy penetration into any fibrous material and greatly reduces splitting and friction. Pan Head screws are ideally used for cabinetry, electrical work, and vinyl decking applications.
