KAMELEON™ Composite Deck Screw

GRK's Kameleon™ Screws are an excellent choice for composite decking applications. The Starhead recess reduces stripping and the under head on this self-countersinking screw has saw-blade like cutting teeth that cut a perfectly clean hole into the decking.

The Kameleon™ also features five rings that have three indented fiber traps on each ring designed to trap fibers and eliminate a mushroom effect.

The CEE thread feature enlarges the screw hole allowing the composite decking to settle easily and increasing the screw's drawing strength. This reduces the friction on the screw shank which results in lowering the driving torque.

The Kameleon™ comes in six colors: Grey, Sage, Sand, Tan, Brown, Redwood.

*Note: Color samples shown are as close as possible to actual colors, within the limits of process color reproduction.
Consult composite deck manufacturer's product guide for correct installations.*

- Strong heads and Starhead recess
- Under head cutting teeth
- Fiber trapping rings
- CEE Thread
- Self-tapping
- Self-countersinking
- Climatek II coated
- W-Cut
- Zip-Tip
- Available in 9 x 1 3/4", 9 x 2 1/2" and 9 x 2 3/4"
